Orion Engineering joins Louisiana Chemical Industry Alliance

PASCAGOULA, Miss. – Louisiana Chemical Industry Alliance (LCIA) recently announced that Orion Engineering has joined the 2014 membership roster, according to Dan S. Borne, LCIA president.

Founded in 1990, LCIA is a partnership between plants and suppliers, representing more than 600 members with thousands of employees from Louisiana's petrochemical industry and related businesses. LCIA is governed by 12 top supplier/contractor executives and 11 chemical plant managers. The organization promotes the interests of the chemical industry and related businesses by impacting the legislative process and regulatory agencies to promote a healthy, globally competitive, and growing supplier/contractor community.

LCIA provides firepower and leverage through methods like grassroots advocacy before legislative and regulatory bodies, fundraising for the political action committee LAMP, and ongoing contact with state and federal elected officials. Overall, LCIA is a united voice for industrial plants and small business owners who are the "hometown" friends, voters, and suppliers working to make a living in the chemical/refining marketplace. The strength of the partnership means progress and survival for an industry providing jobs and maintaining a healthy, safe and high quality of life for Louisiana citizens.
